

Mississippi Whole Schools FY24 Data Report

The annual Mississippi Academic Assessment Program (MAAP) data is used to identify and show improvement in student achievement. Analysis of this data indicates that students enrolled in Mississippi Whole Schools (MWS) consistently outperform their peers at the district and state levels.

As shown in the graphs below, MWS scored significantly higher in English Language Arts (ELA), Math, and Science.

Source of all data: Mississippi Department of Education

This data shows a clear statistical difference within schools consistently and systematically utilizing authentic arts integration and arts education strategies as a part of regular instructional practice. These results support administrators and other decision makers in keeping arts integration at the forefront of instructional practice.
